Contact us today for a personalised consultation and take the first step towards a safer tomorrow.

# Focus On The Flame Retarding of Fabrics In Public Areas.

If you are associated with a theatre, exhibition or conference, boardroom, restaurant, hotel, AirB&B, casino or any public venue, you are required to flame retard your functional and decorative fabric elements.

Areas of public assembly are required to maintain compliance with fire codes.

We provide a certificate of flame retardancy, which states that the materials are flame retarded. Each item is tested in accordance with the applicable fire codes. This provides verification that your items have been appropriately treated.

## Product Data

We use high performance imported flame retardants manufactured to meet all global flame retardant standards. This ensures that we use up to date leading edge technology.

**Soft-Guard Protex Flame-Shield-ZTC** is successfully used for the flame retarding of cellulosic, woolen, synthetic, natural fibres and synthetic fibre blend fabrics, and is suitable for application to all furnishings and trims, curtaining & drapes, automotive and aircraft fabrics as well as barrier cloths.

## Typically requested flame retardant standards:
